Narrative

Investigator Mundy from the Broward County State Attorney's Office contacted the Dive Team to determine if an underwater search be performed. This search was to be performed at the canal located at the 174th marker on the Turnpike. This Deputy was taken to the site by Inv Mundy and upon arrival, the area was surveyed and some excavating of the site would be necessary. Two groups of divers were assigned to cover the entire area. The early team (starting at 0800) worked out from there. This entailed a grid search method, using a 10' x 10' grid. The bottom was packed with silt. Using this method, the area north of the roadway to the canal was covered. (diagram attached). Con't.

contacted the Dive Team to determine if an underwater search be performed. This search was to be performed at the canal located at the 174th marker on the Turnpike. This Deputy was taken to the site by Inv Mundy and upon arrival, the area was surveyed and some excavating of the site would be necessary. Two groups of divers were assigned to cover the entire area.
