

Volume I- Case Incident File  
File 25  
DOT/Jim Byron phone call  
08/25/81-03/25/81

HOFFMAN or HICKMAN:

A Jim Byron from the Department of Transportation (Ft. Pierce Office 464-6330) call reference to information that you requested on construction work on the Turnpike in 1981.

On August 25, 1980 DIXIE Asphalt began work in the area of of the Turnpike that we are intrested in. They based thier operation at mile maker 126 on the access road where we were at the other day. The contract expired March 25, 1981, but Mr. Byron found that the access road was not closed for a long time after.

The company, DIXIE Asphalt, is no longer in operation but is now ADICO co. based out of Orlando. The president of the company is Jamie Badenock.

I attempted to get a telephone number from the Orlando area of the ADICO company with no luck.

Mr. Byron advised that the person that you need to speak to is Red Peck who was the supervisor of the job. Mr. Byron could give no leads on how to get a hold of Peck.
